**RE: Maben Canal Rehabilitation – Construction Notification**

Property Address:

Nevada County APN:

Dear Property Owner,

The Nevada Irrigation District (District) operates and maintains an open canal on your property. We are planning to encase the canal within an 18-inch diameter pipe and cover the pipe to make an access path for future maintenance.

The District has recently contracted Lafleur Engineering to do this work. They will likely be working within the canal, and on your property, around the third week of December 2024.

Any existing raw water services will be reconnected to the new pipe; if you have raw water service, it will be temporarily disrupted during construction.

If you have tenants on your property, please share this information with them and let them know the anticipated dates of construction.

Please feel free to contact me should you need further clarification or have any questions.

Regards,

Adrian Schneider, P.E.

Senior Engineer
