Project Title: Combie Reservoir Sediment and Mercury Removal Project

SEP 25 2009

Project Location (include county): Placer and Nevada

Jim McCauley
COUNTY CLERK OF PLACER COUNTY

Project Description: The proposed project involves the dredging of 150,000 to 200,000 tons of sediments within the upper Combie Reservoir to maintain water storage capacity. Excavated material will be processed through an on-shore mechanical mobile separation and dewatering system. Mercury will be removed from all excavated and dewatered material through a concentrator. Separate, clean sand and aggregate material will be processed through an existing aggregate processing plant on lands to the north or similar plant in Nevada County or Placer County. This project is intended to be an on-going reservoir maintenance activity.

This is to advise that Nevada Irrigation District
Lead Agency or Responsible Agency has approved the above-described project on September 23, 2009 and has made the following determinations regarding the above-described project:

- 1. The project will have a significant effect on the environment.
2. An Environmental Impact Report was prepared for this project pursuant to the provisions of CEQA.
3. Mitigation measures were made a condition of the approval of the project.
4. A mitigation reporting or monitoring plan was adopted for this project.
5. A Statement of Overriding Considerations was adopted for this project.
6. Findings were made pursuant to the provisions of CEQA.

This is to certify that the final EIR with comments and responses and record of project approval, or the Negative Declaration, is available to the General Public at: Nevada Irrigation District office at the address above

Signature (Public Agency) General Manager Title September 23, 2009 Date
