

**“Frequently Asked Questions”  
concerning the herbicides**

**CUTRINE-PLUS and NAUTIQUE**

**1. Is it safe for animals to drink from water treated with Cutrine-Plus or Nautique?**

There are no restrictions for animals drinking the treated water (neither during nor after treatment) at the label rates.

**2. Is it safe to use water from my pond or water service to water plants and lawns during and/or after treatment?**

There are no irrigation restrictions.

**3. Are these products toxic to fish?**

These products may be toxic to koi, goldfish, and trout. These products are safe for bass and bluegill. Remember to turn off the water service going to your pond if you have koi, goldfish, or trout.

**4. What is Cutrine-Plus and Nautique registered for use in?**

Lakes, potable water reservoirs, ponds, fish hatcheries and raceways, crop and non-crop irrigation conveyance systems, ditches, canals, laterals, and golf course water hazards.

**5. After applying Cutrine-Plus or Nautique, how long do I have to wait before I can swim?**

There are no swimming restrictions.
